

INTRODUCTION

All seed potatoes classified by SASA comply with the requirements of The Seed Potatoes (Scotland) Regulations 2015 and Plant Health (Official Controls and Miscellaneous Provisions)(Scotland) Regulations 2019 in relation to the production and marketing of Pre-basic and Basic seed potatoes.

Pre-basic seed crops are eligible for inspection if they are planted with potatoes that were classified or had an inspection report issued the previous year as PB (Field Generation 1, 2 or 3) or PBTC (Mini Tubers) that were obtained from propagation units that have been approved by SASA. All initial planting material in these units must have been derived from nuclear stock (pathogen tested microplants) produced by SASA. Pre-basic crops must be grown on land on which potatoes have not been grown in the preceding 7 years and is free from wart disease and potato cyst nematode. Pre-basic crops are classified provided they meet the strict standards for purity and health at two growing crop inspections and meet the tolerances for tuber inspection for disease, pests, damage and defects.

Basic seed crops are eligible for inspection if they are planted with potatoes that were classified or had an inspection report issued the previous year at a Basic grade (Field Generation 1, 2, 3, 4, 5, or 6), or the appropriate grade of the Pre-basic category as permitted by the above Regulations. Basic seed crops must be grown on land on which potatoes have not been grown in the preceding 5 years and is free from wart disease and potato cyst nematode. Basic seed crops are classified provided they meet the required standards for purity and health at two growing crop inspections and meet the tolerances for tuber inspection for disease, pests, damage and defects.

Only seed potatoes that have been classified and are in sealed containers to which an official label is attached may be marketed. The label will contain details of the potatoes and will confirm if they are Pre-basic or Basic and the GB grade. The person who markets the seed potatoes must provide a sale or delivery note that contains specified details, similar to those on the label, within fourteen days of the sale or delivery.

Those who market seed potatoes are responsible for ensuring that the potatoes comply with the Regulations.

In the Register, crops are listed by GB grades. Each part is sub-divided by variety and geographic location; within each subdivision the producer's name and crop number are shown, together with the area classified in hectares.

Part I - PB. Crops at growing crop inspection that were found to contain not more than 0.01% in total of rogues or undesirable variations (including wildings, bolters); and not more than 0.1% Total virus of which nil % (total) was PVY, PVA or Leafroll (PLRV); and nil % Blackleg.

Part II - S. Crops at growing crop inspection that were found to contain not more than 0.1% in total of rogues or undesirable variations (including wildings, bolters); and not more than 0.2% Total virus of which not more than 0.02% (total) was PVY, PVA or Leafroll (PLRV); and not more than 0.1% Blackleg.

Part III - SE. Crops at growing crop inspection that were found to contain not more than 0.1% in total of rogues or undesirable variations (including wildings, bolters); and not more than 0.5% Total virus of which not more than 0.1% (total) was PVY, PVA or Leafroll (PLRV); and not more than 0.5% Blackleg.

Part IV - E. Crops at growing crop inspection that were found to contain not more than 0.1% in total of rogues or undesirable variations (including wildings, bolters); and not more than 0.8% Total virus of which not more than 0.4% (total) was PVY, PVA or Leafroll (PLRV); and not more than 1.0% Blackleg.

Part V - Organic. Crops of the Union grades PB, S, SE, and E that upon entry into the Classification Scheme were identified by the applicant as being produced to meet the requirements of a recognised organic authority.

Part VI - A list of the names and addresses of the producers whose crops are included in the Register.

SASA cannot accept responsibility for the accuracy of the information provided.

Class A is not permitted for planting in Scotland for seed or ware potatoes.

Trueness-to-type - For tuber coloured variants of established varieties (e.g. Red King Edward) growing crop inspection refers only to foliage type. The responsibility for dressing out any tubers from the produce of the crop which do not conform to the colour of the variant rests with the seller. The Regulations state that for Basic category potatoes the percentage must not exceed 0.1% of the sample taken by an inspector prior to marketing; for Pre-basic category potatoes the amount must not exceed 0.01%.

The Register does not include all seed potato crops inspected by SASA in 2023.

For further information please contact The Seed Potato Classification Scheme, SASA, Roddinglaw Road, Edinburgh, EH12 9FJ. Tel 0131 244 8963 or e-mail John.Ellicott@sasa.gov.scot
